PANOS HG 150 LED

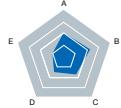

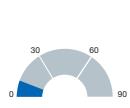

The name PANOS stands for a complete, modular downlight product range that teams exquisite, consistent design with high levels of practical functionality. An extensive selection of models, components and light sources provides unrivalled flexibility for designers and architects, regardless of project size and lighting task. Numerous innovative details save both installation time and expense. Energy-saving technologies and durable, re-usable materials mean that these luminaires use resources economically and won't eat into your budget. The design of PANOS remains true to the designers' vision: good lighting paints metaphors and sets the stage for the comedy of life. The accents set by PANOS wherever people go about their daily lives create a wide variety of effects.

PANOS Q-HG 250

The contemporary architectural style is characterised by pared-down reduction to basic geometrical shapes. The emphasis is on proportion, form and materiality, which coalesce into a single entity. This was the starting point for developing the square PANOS Q downlight. Its straight-line design is expressed not only in its external shape but also in its details. The one-piece angular reflector unit continues the consistent square theme. The frameless model of PANOS Q is particularly unobtrusive and blends light and space in a single minimalist unit.

**ELI****LENI**

ELI: generous amounts of daylight brighten up the atrium with natural light. PANOS downlights supplement optimal illumination in circulation areas. PANOS blends unobtrusively into the architectural concept and at the same time meets requisite design requirements.

LENI: annual energy consumption 10.2 kWh/m²

Real freedom

An important basic idea was the force behind the development of the PANOS downlight product range: to provide a tailor-made downlight in one design format for every application. The members of the PANOS product family make it a uniquely comprehensive product line that blends harmoniously into any architectural setting. An ingenious modular concept with five alternative diameters, from 100 to 250 mm, and two square models measuring 190 and 250 mm, a broad range of reflector optics, a large choice of light sources and attachments all add up to unbeatable scope for creative design. All models can be fitted with a wide variety of accessories, regardless whether they are fixed or swivelling, spot or flood, made of metal or high-quality polycarbonate, recessed or surface mounted. These accessories include reflectors, attachment discs, cover rings, design accessories made of glass, and an abundance of louvre and filter accessories.

Page 52

Economic efficiency

The PANOS family is not only perfect for various application areas and lighting tasks, it also boasts excellent economic efficiency. This includes the possibility of integrating it into intelligent building management systems. Fitted with dimmable electronic ballasts (DALI), PANOS can be controlled by intelligent lighting management systems such as LUXMATE. This not only saves energy, it also makes it possible to set rooms centre-stage using dynamic lighting programs. Opting for PANOS also means going for safety, a fact which is demonstrated not least by the central or distributed emergency lighting applications which can be integrated.

PANOS M

Page 34

PANOS M-L

PANOS M-H

PANOS M

PANOS M-V

PANOS M-D

PANOS M-WW (Wallwasher)

Advantages

- 1100 lm or 2000 lm projected light, ideal replacement for 1/26 W or 2/26 W fluorescent lamps
- PANOS Pure White: 3000 K ad 4000 K static colour temperature
- PANOS BioMotion:
 - 2700 to 6500 K variable colour temperature, optionally RGB
 - Dynamic colour scenarios

Application areas

- Service life of up to 50,000 hours at 70 % luminous flux reduces maintenance effort and maintenance costs
- IR- and UV-free is gentle on fragile exhibits and surfaces

- Shops
- Museums
- Hotels and wellness areas
- Health and Care
- Foyer and reception areas
- Corridor areas and hallways

- Efficient lighting thanks to high light output ratios
- Uniform, wide-area lighting
- Compact space requirement thanks to shallow mounting depth of just 100 mm

- Creative design scope thanks to technical lighting and decorative accessories
- Non-iridescent LF and LG reflectors thanks to innovative sputtering method
- Selection of light sources rated from 13–57 W

- Foyer and reception areas
- Corridor areas and hallways
- Restaurants
- Adjoining rooms

- Easily meets requirements of EN 12464
- General lighting with perfect glare control
- Various reflectors can be chosen depending on the illumination task
- Non-iridescent HF and HG reflectors thanks to innovative sputtering method

- H-WW reflectors in same look – for additional highlighting of vertical surfaces
- Selection of light sources rated from 13–57 W

- Office areas
- All areas where perfect glare control is required

- PANOS M:**
- Standard flat ring design in PANOS M family
 - Creative design scope thanks to technical lighting and decorative accessories
 - Meets exacting requirements in terms of fire loads
 - Wide range of lamp types allows both pinpoint accent lighting and wide-area general lighting

- PANOS M-L / PANOS M-H:**
- Non-iridescent LG and HG reflectors thanks to innovative sputtering method
 - Efficient lighting thanks to high light output ratios with PANOS M-L (Low)
 - PANOS M High easily meets requirements of EN 12464

- Uniform, wide-area lighting
- Light-tight (no stray light when used with perforated ceilings)

- PANOS M-V:**
- Inwardly swivelling luminaire head (35°) allows high degree of flexibility with an uncluttered ceiling look

- PANOS M-D:**
- Maximum glare limitation thanks to dark-light reflector

- PANOS M-WW:**
- Uniform illumination of vertical surfaces such as walls, shelves, paintings

- Foyer and reception areas
- Corridor areas and hallways
- Conference rooms and offices
- Shops, stores and malls
- Lounges and cafeterias
- Museums and galleries
- Buildings with high ceilings
- Prestigious areas

The right downlight

for every application

Page 48

PANOS A-L

PANOS A-H

PANOS A-M

PANOS Q

Page 52

PANOS Q-L

PANOS Q-HIT

PANOS Q-H

Advantages

- High degree of flexibility thanks to swivel-in and swivel-out function and rotation through 360°
- Special filters for use in food areas
- Coloured accents are possible by using colour filters

Application areas

- Shops, department stores and malls
- Lounges and cafeteria
- Museums and galleries

-
- Reduced construction and installation costs thanks to surface mounting on ceiling (exposed concrete ceilings)
 - Uniform standardised look thanks to consistent design
 - Impressive versatility thanks to various reflectors for PANOS L and H range

- Lighting in high-ceilinged rooms using PANOS A HIT
- Creative design scope thanks to technical lighting and decorative accessories

- Buildings with exposed concrete ceilings
- Buildings with high-ceilinged rooms (fitted with HIT lamps)

-
- Compact space requirement thanks to shallow mounting depth of just 100 mm in case of PANOS Q-L
 - PANOS Q High meets requirements of EN 12464 without additional attachments
 - Uniform, wide-area lighting fitted with one lamp in case of PANOS Q-L
 - General lighting with perfect glare control using PANOS Q-H fitted with one or two lamps
 - Applications using PANOS Q-HIT have the same look as PANOS Q-L

- Creative design scope and design variety thanks to four different reflector surfaces and various design frames
- Reflectors with smooth and faceted non-iridescent optics thanks to innovative sputtering method
- Abundant design options using decorative attachments
- One-piece reflector unit made of high-quality polycarbonate

- Foyer and reception areas
- Corridor areas and hallways
- Conference rooms and offices
- Shops, department stores and malls

Lighting solution: PANOS Q-LM 190

PANOS HG 150 LED, painted | 1:1 scale

PANOS LED

The latest member of the PANOS family gives an impressive demonstration of what is now possible using innovative LED technology. Its special appearance gives a hint of some of its exceptional features: high energy efficiency and remarkably long maintenance intervals bring cost benefits and ensure environmental sustainability. IR/UV-free light from PANOS LED makes it possible to illuminate even sensitive areas in museums and shops where the best possible protection must be provided for exhibits and merchandise on display. There is a choice of two basic versions depending on the particular application: PANOS Pure White is available in two colour temperatures and lumen packages whereas PANOS BioMotion with RGB light, for example, makes it possible to accurately mimic natural changes in light over the course of the day. The diameter of all the LED models is 150 mm.

Design size
ø 150 mm

Reflectors
Smooth, matt, painted

The high illuminance levels of PANOS LED Pure White achieve the same brightness as compact fluorescent lamps. The powerful 1100 lumen luminaire's brightness is equivalent to that of a 26 W fluorescent lamp, and the 2000 lm version is equivalent to two 26 W or one 32 W fluorescent lamp. Its high luminous flux demands effective thermal management. The 2000 lm PANOS LED therefore incorporates special cooling. This ensures many years of trouble-free operation. Glare limitation (UGR < 19) makes this downlight suitable for DSE workstations, as is PANOS LED BioMotion.

PANOS HG 150 LED BioMotion
Smooth reflector

Inspired by the perfect model provided by mother nature, PANOS BioMotion can be synchronised with the human body clock to ensure a greater sense of well-being and productive capacity. Besides mimicking variations in daylight over the course of the day through its colour temperature spectrum, the luminaire also makes it possible to generate dynamic colour-changing RGB lighting scenarios as required by the EMOTION touch panel. The luminaire can therefore be used to produce refreshing lighting scenes in enclosed spaces in particular. The luminaire uses RGB technology, supplemented by white LEDs, to achieve a colour temperature of 2700 K to 6500 K at a colour rendition index Ra of 80.

PANOS BioMotion

Dynamically changing colours and variable colour temperatures

PANOS BioMotion
Cool white light

PANOS BioMotion
Dynamic RGB colour changes

PANOS BioMotion, installed in the anteroom to the bank vault in the Hohenhausen Savings Bank, changes the colour temperature and intensity of light over the course of the day in the same way as in nature: from warm white through cool white to warm white light again. In addition, dynamic colour-changing RGB accent lighting sets the strongroom atmospherically centre-stage in the evening. A lighting solution using PANOS BioMotion creates the best possible light for people while also delivering energy-efficient lighting thanks to intelligent control.

PANOS HG 150 LED
Active cooling

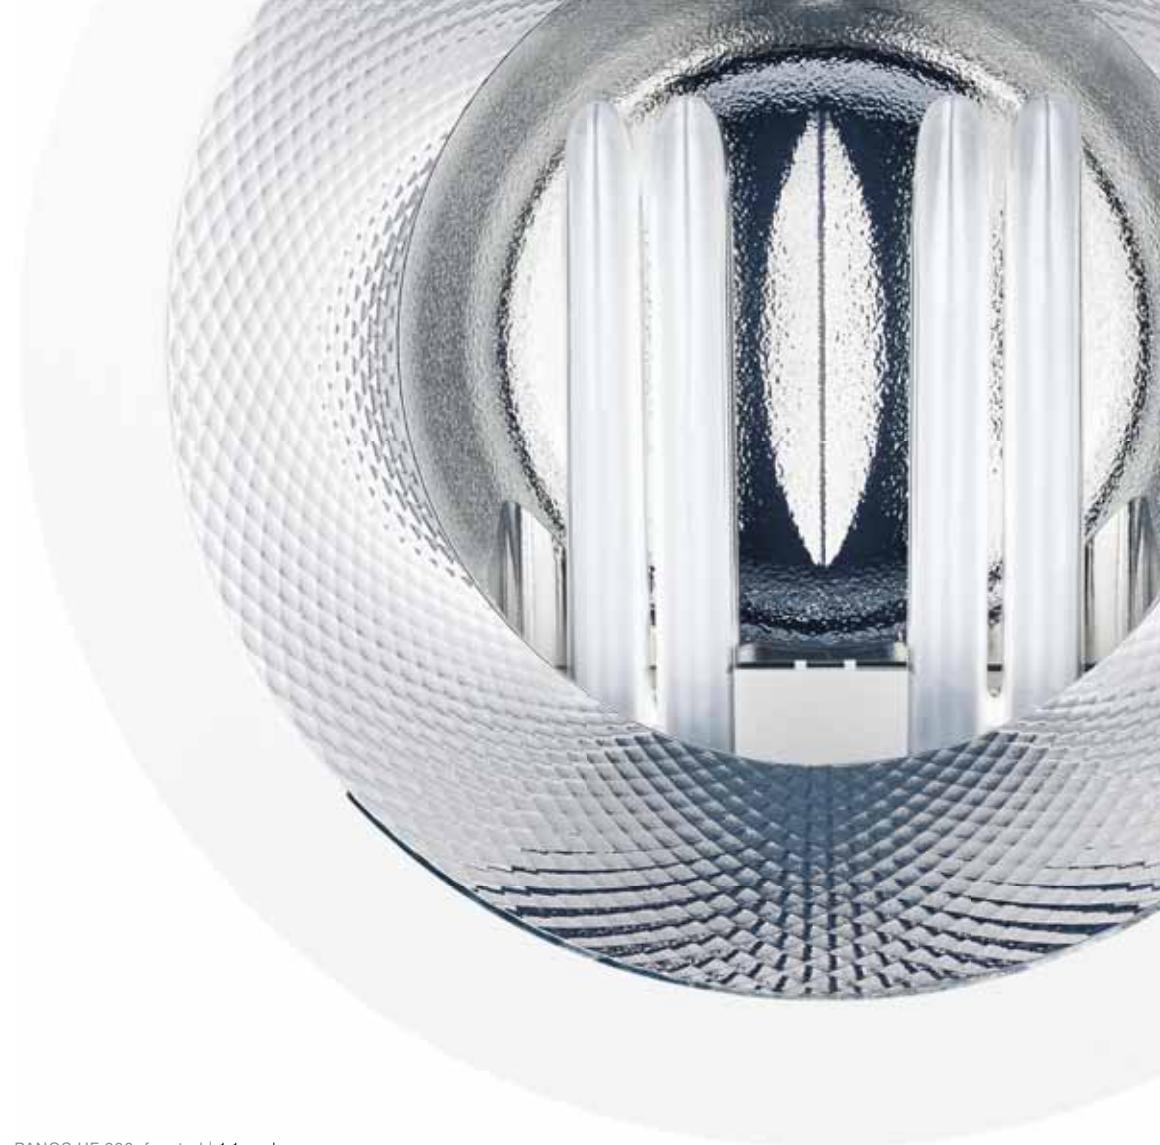

High luminous flux levels also produce heat in the case of LED lighting systems. Effective cooling of the circuit board is a crucial factor in achieving a long service life. This is why Zumtobel uses the "SynJet™" active cooling system, which reduces surface temperatures by up to 30 °C, for PANOS LED. A vibrating membrane or diaphragm creates air turbulence and expels warm air from the LED housing through cooling fins. The system generates negligible noise (25 db) – equivalent to the noise of someone 1 m away breathing.

Cooling fins made of
aluminium

Rear of heatsink with
integral diaphragm

PANOS HF 200, faceted | 1:1 scale

PANOS L and H

One can almost describe these downlights as classics because PANOS L (Low) and H (High), with a diameter of 175 mm, 200 mm or 250 mm, boast all the requisite features which are important for providing optimum lighting quality at and around the workstation. The light output ratios of the latest models have been significantly improved by a new surface coating. The glare control characteristics of both models meet the requirements of EN 12464. Design and function are reconciled in one impressive unit. This is all the more applicable because the modular design of PANOS with its many possibilities of different combinations gives lighting designers everything they need to create lighting scenarios that are just right for specific applications.

PANOS L and H

The pros in office environments

LG/HG reflector

Even in the smooth version of the highly specular reflector, innovative coating and matching reflector technology provide glare-free task area lighting at the highest level.

HWW reflector

Light is distributed asymmetrically without the need for any additional clip-in/on parts thanks to an ingenious rib structure – this is ideal for highlighting vertical surfaces.

PANOS L (all sizes)
Mounting depth 100 mm

Mounting depth of just 100 mm

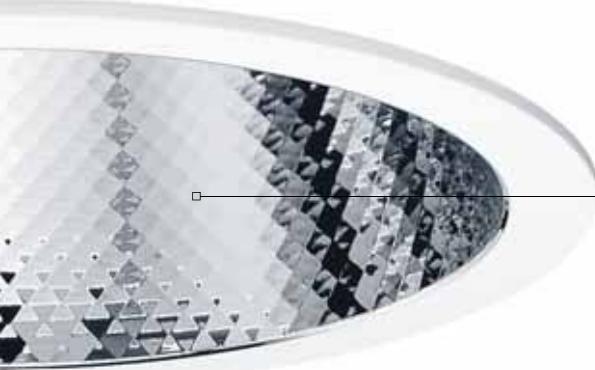

Thanks to the use of a radial louvre, PANOS L is able to provide lighting in conformity with standards for DSE workstations even in situations where space is tight.

PANOS H
Mounting depths: 120 mm,
145 mm and 190 mm

Ergonomic working Meets the most demanding glare limitation requirements without any additional accessories. The HF and HG darklight optics comply with category UGR 16/19 of European standard EN 12464.

Precision detailing The excellent technical lighting characteristics of PANOS L and H reflector optics would be impossible to achieve if it were not for the exceptional accuracy of their injection-moulded components made of high-grade, heat-resistant polycarbonate that direct the light. Zumtobel uses the sputtering method to coat the reflectors, regardless whether they are faceted, smooth or wallwasher reflectors. Aluminium is sputtered onto the plastic in a high vacuum, and a very thin but extremely hard protective layer is applied over this. Compared to the conventional vapourising or metallising of surfaces with aluminium, sputtering ensures a significantly higher quality of the layer and a remarkable improvement in edge coverage.

**LF/HF reflector**

Precision-shaped facets break the light down so that it is more gentle on the eye. This results in brilliant effects at reduced luminance, and an increase in light output.

**LL/HI reflector**

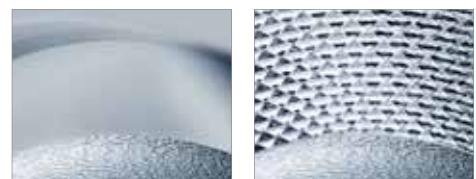

Pleasant ambient lighting is provided by the smooth white optic. It also fits in perfectly with the decorative accessories and the IP 54 glass attachments.

**LM/HM reflector**

The discreet matt aluminium surface of the reflector does not look as though it needs dusting all the time. It looks clean, ensuring PANOS always looks great.

This unique metallisation process has set a new standard in the market. Other advantages include non-iridescence and simple cleaning using a cleaning cloth (see accessories).

No environmental impact Compared with conventional coating methods (anodising), sputtering is also environmentally benign because it produces no chemical emissions that have an impact on the environment. In addition, all PANOS L and H luminaires are manufactured using halogen-free materials, and are 100 % recyclable.

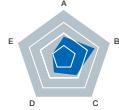

Smooth and faceted polycarbonate reflectors | aluminium-coated (sputtered)

PANOS

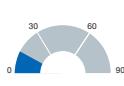

The art of inspiration

ELI

LENI

ELI: the uncluttered lines of the lighting work well with the straight-line architectural concept and make it easier to find one's way around the building. The zonal lighting in public areas also saves energy. Focal lighting points set accents in the room.

SLOTLIGHT II light line

PANOS M-D 150 | 1:1 scale

PANOS M

This accomplished pairing of design and technology naturally also includes the PANOS M (Metal) part of the product range which has grown with the addition of two new members: PANOS M-V and PANOS M-D. The use of heat-resistant metal reflectors considerably extends the range of lamps that can be fitted in PANOS, and hence its range of uses. In 100, 150, 200 and 250 mm ceiling cutouts, PANOS M can be used with a very varied selection of light sources ranging from low voltage and high voltage halogen lamps, compact fluorescent lamps through to high-wattage discharge lamps. PANOS M-WW provides a powerful wallwasher that supplements the varied applications of PANOS M still further. The additional use of specific technical lighting accessories such as IR/UV filters means that PANOS M is also recommended for solving tricky lighting tasks such as those in shops or supermarkets.

swivel in 0-35°

This recessed directional spotlight, with its large swivel range of up to 35°, a 360° rotation range and a sputtered anti-glare reflector, can cope even with the exacting requirements encountered in museums and shops. As a special luminaire for presenting items and merchandise precisely, PANOS M-V stays flush with the ceiling in all its positions, thereby ensuring an uncluttered ceiling look.

PANOS M-D 100

PANOS M-D 150

In PANOS M-D, a combination of glare-free reflector geometry and highest-grade reflector surfaces reliably prevents directly viewing the light source and protects against reflections. Even when the luminaire is switched on, it retains its dark appearance and the light source remains hidden from view. The result: the room is aglow but the light source remains invisible.

PANOS M and MWW

High-tech lighting tools

PANOS M-LG 250 | TC-TELI

PANOS M-LG 200

PANOS M-LG When fitted with 2/42 W lamps, PANOS M-LG achieves an excellent light output ratio in excess of 75 %, with a shallow recessed depth of just 100 mm.

PANOS M-HG 200

PANOS M-HG The metal reflector of PANOS M-HG minimises direct glare to UGR 16/19 in conformity with EN 12464 without the use of any additional attachment elements.

Two members of the product range, PANOS M-L (Metal Low) and M-H (Metal High) with either a matt or smooth reflector surface, are fitted with TC lamps rated 18 to 57 W. It is even possible to use TC-TELI amalgam lamps, distinguished by their constantly high luminous flux. A sophisticated ventilation system not only permits recessed mounting in the ceiling without any escape of stray light, it is also compatible with an enclosed IP 54 version. Another innovative highlight of PANOS M HG/LG are their sputtered metal reflectors. These achieve a non-iridescent darklight effect and make it possible to improve light output still further.

PANOS M-WW 150 | HIT-TC-CE

At first glance, you would not be able to externally distinguish the PANOS M-WW from the PANOS M rotationally symmetrical downlight – PANOS M-WW blends inconspicuously into the ceiling but, as a wallwasher, sets the stage masterfully for walls, pictures, shelves and much more besides. The ceiling look and the interior design remain undisturbed thanks to the uniform design of the front ring. PANOS M-WW is available in two diameter sizes (200 mm and 250 mm). Its ability to accommodate various light sources up to 250 W lends PANOS M-WW even greater flexibility still.

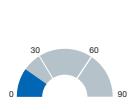

Flange as a design element The inconspicuous 2 mm thick flange made of die-cast aluminium blends harmoniously into the ceiling and also gives PANOS M a uniform appearance right across the range.

PANOS HG 250 | Flange

Wide variety of lamps PANOS M makes it possible to use a wide variety of different light sources (TC, HIT, HST, QT, TC-TELI) as well as various technical lighting accessories such as IR/UV filters and special foodstuff filters.

**ELI****LENI**

ELI: Due to their positioning, PANOS downlights assume two functions at a time: apart from lighting circulation areas, the streaks of light on the wall make for a representative appearance of the foyer. The natural brightening of the ceiling through indirect light creates the impression of an atrium flooded with daylight.

LENI: annual energy consumption 18.29 kWh/m²

PANOS S 200 | 1:1 scale

PANOS S

In many respects, PANOS S (Swivelling) really sets the trend. The light direction is easily adjustable, both horizontally and vertically. The wide range of up-to-date light sources available leaves nothing to be desired – whether PANOS S is used as a spot or flood. The unique flip-out tab on the surround ensures that PANOS S can be positioned easily in the desired location. This flexible handling is also matched by the wide variety of available design sizes (100 mm, 150 mm, 200 mm up to 250 mm diameters).

PANOS S 100

PANOS S 150

PANOS S 200

PANOS S 250

PANOS S

More freedom for vertical adjustment

PANOS S 150 | QT12

Reflector | Spot

Reflector | Flood

PANOS S | Flip-out tab

Matching reflectors for every occasion

Spot and flood reflectors for PANOS models S 100, S 150 and S 200 perfectly set the stage for products and brands. The reflector geometry is precisely matched to every light source to ensure an extremely high light output.

Small tab – big effect The PANOS S housing is extremely mobile and particularly convenient to use thanks to its integral flip-out tab. Just flip out the tab and move the housing into the required position. The generous surface area of the flip-out tab ensures maximum operating convenience. Then flip it in again, and the tab disappears from sight into the luminaire. The PANOS S housing can be adjusted while the downlight is in use without any problem because the flip-out tab is arranged so that it never heats up. The direction of light can be modified almost without restriction at any time. No need for any tools, installation effort or help from anyone else.

PANOS S | swivelled out to 60°

With PANOS S fully swivelled out to 60°, it is possible to illuminate a wall or a shelf from its top edge. The choice of spot or flood reflectors guarantees perfect light distribution.

PANOS S | swivelled out to 45°

The separate adjustability of the lighting head and housing is absolutely unique for downlights. This allows you to obtain selective shading of a specific area and also prevents people looking directly into the lamp from the side.

PANOS S | swivelled in 15°

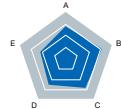

For illuminating different levels of shelving or retail islands in a shop, PANOS S can be swivelled into the ceiling by up to 45°. In this position, the lighting head remains inconspicuous in the ceiling and gives it a very calm appearance.

PANOS

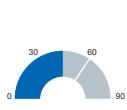

encourages impulse buying

ELI

LENI

ELI: besides pleasant bright ambient lighting, concentrated light from the swivelling PANOS specifically brings merchandise into the foreground. The lighting is supplemented by the room's emotive cove lighting.

LENI: annual energy consumption 45.07 kWh/m²

Lighting solution: PANOS S 150 for rear wall lighting,
PANOS M 150 for ambient lighting

PANOS A-H 200, smooth | 1:1 scale

PANOS A

The downlight range's field of application is extended significantly by the PANOS A (Surface-mounted) version with a reflector diameter of 200 mm. Development of the surface-mounted downlights was based on PANOS L and H, and they are just what is needed in any situation where suspended ceilings have been rejected on grounds of cost or for aesthetic reasons, but importance is still attached to perfect lighting quality. It is optionally available with TC or HIT lamps. The high version of PANOS A with a metal reflector (MG) for HIT lamps is specially earmarked for lighting rooms with high ceilings.

PANOS A-L 200

ø 230 mm, height 160 mm

Reflector optic
Faceted, smooth, matt,
painted

The surface-mounted PANOS A is available as a low (L) or high (H) model. Four different reflectors made of high-quality polycarbonate or a metal reflector in the case of PANOS A-MG are available for both models. Like the recessed versions, these luminaires are distinguished by their outstanding technical lighting characteristics which include excellent glare control: the PANOS A HG/HF model, without any technical lighting attachment elements, satisfies the stringent requirements of EN 12464 with a UGR figure of 16/19. Installation on the ceiling is really easy, and lamps and reflectors can be replaced from below without using any tool.

PANOS A-HM 200

PANOS A-MG 200

PANOS A-L with radial louvre

PANOS A-L with decorative disc

Variety of accessories Because PANOS L/H and PANOS A share their reflectors, the entire range of technical lighting and decorative accessories available (louvre, IP 54 attachment, decorative rings) can be used.

PANOS Q

The logical consequence of straight-line thinking – this sums up the idea behind PANOS Q (Square) in simple terms. PANOS Q is inspired by the contemporary pared-down, geometric stylistic idiom, and both models (190 x 190 mm and 250 x 250 mm) continue this trend consistently. The luminaire can be fitted with HIT lamps as well as compact fluorescent lamps. The one-piece reflector unit offers symmetrical, wide-angle light distribution with a good cut-off angle, thus making PANOS Q especially efficient when used in offices and administrative premises. PANOS Q has, however, also become a firm favourite in shops and other sophisticated environments, not least because of the wide variety of creative design possibilities provided by its decorative and technical lighting attachments.

PANOS Q-L 190 This is the smallest commercially available downlight for compact fluorescent lamps. With a mounting depth of just 100 mm and a side length of 190 mm, it fits straightforwardly into almost any ceiling system. The luminaire's especially high light output ratio (thanks to its optimally matched reflector geometry and shallow overall height) is a decisive advantage.

PANOS Q-HIT 190 Wherever brilliant colour rendition is important, for example, in showrooms or shops, the benefits of the HIT version are immediately visible. PANOS Q is therefore capable of handling an extremely diverse range of lighting situations while maintaining a consistent appearance.

PANOS Q-LG 190

PANOS Q-HIT 190

PANOS Q-HG 250

PANOS Q-H 250 The larger model in the PANOS Q series meets the requirements of the EN 12464 glare control standard without additional attachments. This model is therefore predestined for general lighting of DSE workstations. If required, PANOS Q can be upgraded to protection class IP 54 using an optional glass panel. PANOS Q-H can be fitted either with one or two lamps. The high luminous flux when fitted with 2 x 42 W offers sufficient output capacity for large surface areas and high ceilings and deserves a special mention.

Persuasive freedom of design

for straight-line architecture

PANOS Q-HF 250
"Faceted" reflector

Faceted

Smooth

Matt

Painted

Smooth HIT (PANOS Q-HIT only)

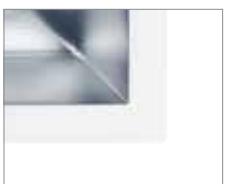

Reflectors Four different reflector surfaces, each in two design sizes, meet the most important technical lighting and design requirements in the case of PANOS Q. The reflectors in both sizes are one-piece units moulded from high-grade polycarbonate to ensure optimum strength and light-tightness. The reflector top is made of die-cast aluminium and optimises thermal management. Whichever reflector is chosen, they all feature the same consistent straight-line geometry. The brilliant, precision-cut facets of the diamond optic are absolutely innovative in a square downlight.

PANOS Q-HF 250
"Titanium" frame

Titanium finish frame

White frame

Chrome frame

Frameless

Frames PANOS Q models can adapt to any room situation, both in terms of technical lighting performance and design. A selection of various frame designs makes a considerable contribution towards achieving this. Purists in particular will not fail to appreciate the frameless model, which accepts a secondary, minimalist role to the architecture. Light emerges from an apparently floating cube.

PANOS Q-HF 250
"Askella pattern" attachment

Cover frame

Design frame

Design attachment

IP 54 attachment

Technical lighting attachment

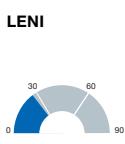

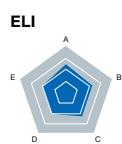

Suspended attachment

Attachment elements With an attachment fitted, the downlight becomes a special feature of the interior and, although still entirely unobtrusive, can provide a variety of design accents. Especially where the light emitted is to be visible, design attachments create an interesting interplay of light.

PANOS

for a stimulating feel-good factor

ELI: PANOS Q ensures that the pharmacy is uniformly lit. Vertical shelf surfaces are lit by luminaires with asymmetrical light distribution and spotlights which can be used flexibly in order to ensure optimal product recognition.

LENI: annual energy consumption 28.17 kWh/m²

Ross pharmacy | Lage/D

Architect: Bussemars Architects | Lage/D

Lighting solution: PANOS Q-HF 250, PANOS Q-HF 250 with wallwasher attachment, VIVO M spotlight, CARDAN SPIRIT CS-E1 gimbal-mounted luminaire module

PANOS installation

Time-saving, no-tool installation

Insert the mounting frame and tighten the mounting springs

Quickly connect the wire(s) to the PANOS ballast unit and insert the reflector unit

Fasten/loosen the bayonet catch with a twist of the wrist

Fit/replace the light source

Fix an attachment using the bayonet catch on the mounting ring

PANOS installation | Round design*

Intelligent design details mean that PANOS downlights can be installed and uninstalled entirely without the use of any tools. First install the sturdy die-cast aluminium ring that is fixed in the ceiling by spring mountings. Then simply insert the reflector unit in the case of round versions and lock it by using the bayonet catch. Thanks to its twist and lock mechanism, both the reflector unit and accessories can be installed or removed with a twist of the wrist.

* Instructions apply to all round PANOS models except PANOS A models

Insert the mounting frame

Quickly connect the wire(s) to the PANOS ballast unit and insert the reflector unit

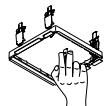

Fit and lock the cover frame

Fit and lock the cover frame with an inserted decorative attachment

Relamping of PANOS Q HIT

Easy installation – even of the frameless version: the special mounting frame is simply inserted into the cut-out and fixed with screws. Filler or plaster can then be applied up to the black contact edge.

Ease of installation and maintenance are equally characteristic of PANOS Q. In this case, locking of the reflector unit is acknowledged by an audible click. Finally, the cover frame is mounted and locked in place with a simple shift movement. The reflector automatically recedes giving the frame space to fit directly against the ceiling. This "shift and lock system" has been specially developed by Zumtobel and is also used for fixing the attachments.

PANOS installation | Square design

I...I Shared properties
PANOS LF/LG/LM/LL

- Ideal where ceiling space is limited: recessed depth just 100 mm
- Reflector/cover ring unit made of high-quality, UV-resistant polycarbonate
- Cover ring, white
- Horizontal lamp position
- Complete model comprises luminaire and ballast unit

- 5-pole terminal with plug-in connection
- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector/cover-ring unit by means of bayonet fixing

- Please note: When separately ordered attachment elements are used, the holding ring is included in the supply of the accessory
- IP 54 possible using accessories
- Models with 1-hour or 3-hour emergency lighting available on request

PANOS LF 175/200/250 with faceted optic

- I...I
- Symmetrical wide-angle beam with high efficiency level
- Faceted reflector; highly-reflective aluminised finish for zero iridescence
- Suitable for use with VDT workstations; UGR 16/19 when fitted with radial louvre attachment (see cover elements)
- With 2/42 W or 1/57 W, TC-TEL reflector head made of aluminium

I...I Shared properties

PANOS HG LED/HM LED

- Reflector made of high quality UV-resistant polycarbonate
- Mounting/cover ring, white
- Complete model comprises luminaire and ballast unit
- 5-pole terminal with plug-in connection

- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector unit

- Please note: When separately ordered attachment elements are used, the holding ring is included in the supply of the accessory
- IP 54 possible using accessories

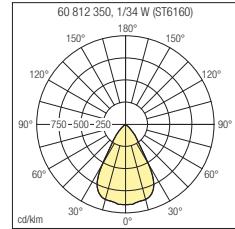

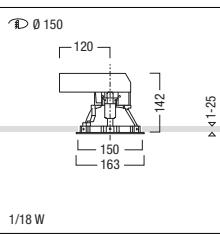

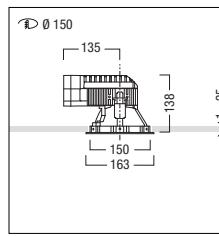

PANOS HG 150 LED with smooth optic

- I...I
- Symmetrical wide-angle beam with optimum photometric performance
- Smooth reflector; highly reflective aluminised finish for zero iridescence
- DSE-workstation compatible: UGR < 19
- 50,000 h service life at 70 % luminous flux

PANOS HM 150 LED, BIOMOTION with frosted optic

- I...I
- Colour-temperature adjustment from 2,700 to 6,500 K by DALI signal
- 10 to 100 % adjustment of illuminance level by DALI signal
- RGB (red/green/blue) dynamic colour lighting possible via DALI signal
- Power consumption: 40 W (48 W at end of operating life)
- 1,100 lm projected light at 4,000 K
- Stabilized colour temperature independent of illuminance
- "Cool" light without UV and IR components
- Matt reflector with smooth aluminum-look finish
- 35,000 h service life at 100 % luminous flux
- Please note: can only be controlled in combination with Zumtobel EMOTION Touchpanel

I...I Shared properties
PANOS HF/HG/HM/HL

- Reflector/cover ring unit made of high-quality, UV-resistant polycarbonate
- Cover ring, white
- Horizontal lamp position
- Complete model comprises luminaire and ballast unit
- 5-pole terminal with plug-in connection

- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector/cover-ring unit by means of bayonet fixing

- Please note: When separately ordered attachment elements are used, the holding ring is included in the supply of the accessory
- IP 54 possible using accessories
- Models with 1-hour or 3-hour emergency lighting available on request

PANOS HF 175/200/250 with faceted optic

- I...I
- Symmetrical wide-angle beam with optimum photometric performance
- Faceted reflector; highly-reflective aluminised finish for zero iridescence
- Suitable for use with VDT workstations; UGR: 16/19
- With 2/42 W or 1/57 W, TC-TELI reflector head made of aluminium

PANOS HWW 175/200/250 with wallwasher optic

850°C

- Downlight component with additional asymmetric light distribution for wall illumination and picture accentuation
- Wallwasher reflector; highly specular, aluminised finish with partial fluting giving zero iridescence
- Horizontal lamp position
- Cover ring, white
- Reflector/cover ring unit made of high-quality, UV-resistant polycarbonate
- With 2/42 W or 1/57 W, TC-TELI reflector head made of aluminium
- Complete model comprises luminaire and ballast unit
- 5-pole terminal with plug-in connection
- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector/cover-ring unit by means of bayonet fixing
- Models with 1-hour or 3-hour emergency lighting available on request

Compact fluorescent lamps (TC-TELI, TC-TEL, TC-DEL)

- A scatter plot showing the relationship between the number of nodes (n) and the number of edges (m). The x-axis represents the number of nodes (n) from 1 to 100. The y-axis represents the number of edges (m) from 0 to 100. Data points are plotted as blue squares. A diagonal line represents the expected random graph distribution. The data points show a clear linear trend, indicating a power-law-like behavior.

I...I Shared properties
PANOS M LG/LM

- Symmetrical wide-angle beam with optimum luminous efficiency achieved specifically at high wattages
- Ideal where ceiling space is limited: recessed depth just 100 mm
- Light-tight luminaire housing in ceiling
- Mounting/cover ring, white
- Horizontal lamp position
- Suitable for use with a sealed panel (e.g. IP 54 covers) for any wattage
- Low fire load
- Complete model comprises luminaire and ballast unit
- 5-pole terminal with plug-in connection
- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector unit
- Please note: When separately ordered attachment elements are used, the holding ring is included in the supply of the accessory
- Models with 1-hour or 3-hour emergency lighting available on request
- Other dimmable versions available on request

PANOS M LG 200/250 TC-TEL / TC-DEL

850 °C

- I...I
- Smooth metal reflector; highly reflective aluminised finish for zero iridescence
- Suitable for use with VDT workstations; UGR 16/19 when fitted with radial louvre attachment (see cover elements)

PANOS M 150/200/250 TC-TEL

850°C

- Smooth reflector made of highest grade aluminium, highly specular finish, iridescence-free
- Vertical lamp position
- Mounting ring, white
- Complete model comprises luminaire and ballast unit
- 5-pole terminal with plug-in connection
- Installation: recessed ring made of die-cast aluminium with spring clips for no-tool recess into ceiling for ceiling thicknesses 1–25 mm
- No-tool quick installation of reflector unit by means of bayonet fixing
- Please note: When separately ordered attachment elements are used, the holding ring is included in the supply of the accessory
- Models with 1-hour or 3-hour emergency lighting available on request

I...I Shared properties
PANOS Q HF/HG/HM/HL

- Light-tight luminaire housing in ceiling
- Horizontal lamp position
- Cover frame made of die-cast aluminium
- Model without flange flush-mounted in ceiling
- Complete model comprises luminaire and ballast unit
- Dimensions of ballast unit: 278 x 114 x 53 mm
- 5-pole terminal with plug-in connection
- Installation: mounting frame made of die-cast aluminium with spring clips for no-tool installation in ceilings with thickness 1–25 mm
- Models with 1-hour or 3-hour emergency lighting available on request

PANOS Q HF 250 with faceted optic

- I...I
- Faceted reflector unit made of high-quality UV-resistant polycarbonate, highly specular, iridescence-free
- Wide-angle light distribution, suitable for lighting DSE workstations (UGR < 19)

PANOS Q LG 190 with smooth optic HIT CE / HIT-TC-CE

HIT-CE G12 HIT-TC-CE G8,5 850°C

- Smooth reflector unit made of high-quality UV-resistant polycarbonate, highly specular, iridescence-free
- Light-tight luminaire housing in ceiling
- Horizontal lamp position
- Optimum darklight characterisitc for reflector achieved when glass cover is set back
- Cover frame made of die-cast aluminium
- Model without flange flush-mounted in ceiling
- Connection: GST 18/3 Wieland plug
- Please order ballast separately
- Installation: mounting frame made of die-cast aluminium with spring clips for no-tool installation in ceilings, ceiling thickness 1–25 mm
- HIT models can also take 1/20 W HIT-TC-CE or 1/35 W HIT-CE/HIT-TC-CE lamp

Louvre

- For improved glare control of PANOS Q LF/LG/LM/LL recessed luminaires with compact fluorescent lamps
- Meets requirements of EN 12464 for DSE workstation lighting when fitted with faceted or smooth optic
- Attachments can be retrofitted any time without using tools
- Please note: cannot be used with wallwasher attachment and HIT

Louvre for

PANOS Q190 mm	60 800 380
For frameless model, please also order the support frame 60 800 510 or 60 800 511.	

Wallwasher attachment

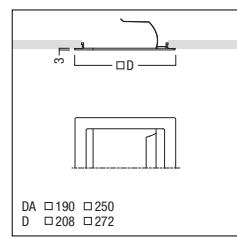

- Additional kicker reflector for use with square PANOS recessed luminaires to provide accenting with uniform illumination
- Uniform wide-beam illumination from downlight component
- Can also be used with IP 54 cover
- Attachments can be retrofitted any time without using tools

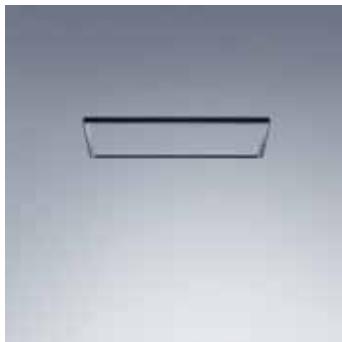

Attachment, wallwasher for

PANOS Q190 mm (HIT)	60 800 508
PANOS Q190 mm (TC)	60 800 381
PANOS Q250 mm (TC)	60 800 420

For frameless model, please also order the support frame 60 800 510 or 60 800 511.

Support frame for frameless model

- Accommodates PANOS Q protective glass covers (clear, opal and patterned) in a frameless PANOS Q recessed luminaire so that the covers fits flush with the ceiling.
- The black support frame and protective glass fit flush with the ceiling; the reflector is surrounded by a black shadow line
- Cannot be used with 2/42 W TC-TEL

Support frame for

PANOS Q190 mm, frameless design	60 800 510
PANOS Q250 mm, frameless design	60 800 511

Please order protective glass cover separately.

IP 54 attachment, clear

- In order to achieve protection type IP 54 using square PANOS recessed luminaires with cover frame in closed ceilings
- With clear glass panel fitted flush inside cover frame
- Attachments can be retrofitted any time without using tools
- Cannot be used with 2/42 W TC-TEL

Transparent attachment (IP 54) for

PANOS Q190 mm

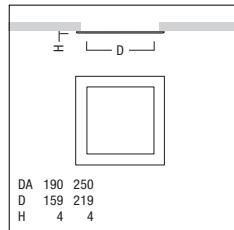

Order no.

60 800 374

INDUSTRY AND ENGINEERING**SPORT AND LEISURE****TRANSIT AREAS AND PARKING****OFFICES AND COMMUNICATION****PRESENTATION AND RETAIL****HOTEL AND WELLNESS****ART AND CULTURE****HEALTH AND CARE**

Zumtobel is the internationally leading supplier of integral lighting solutions for a wide variety of applications in professional interior lighting:

Industry and Engineering
Offices and Communication
Education and Science
Presentation and Retail
Hotel and Wellness
Art and Culture
Health and Care
Sport and Leisure
Transit Areas and Parking
Orientation and Safety

We provide unique customer benefit by integrating technology, design, emotion and energy efficiency. Under the Humanergy Balance concept, we combine the best possible ergonomic lighting quality for people's wellbeing with the responsible use of energy resources.

The company's own sales organisations in twenty countries as well as commercial agencies in fifty other countries form an international network of experts and design partners providing professional lighting consulting, design assistance and comprehensive services.

Corporate goal: We want to use light to create worlds of experience, make work easier and improve communications and safety while remaining fully aware of our responsibility to the environment.
